BSE & TSE Statement

TEK Products & Services, Inc. confirms that certain raw materials of animal origin are intentionally used in the manufacture of some printing inks, including shellac (derived from the lac insect) and, in specific formulations, carmine (derived from cochineal insects).

To the best of our knowledge, based on supplier documentation and formulation review, these materials are not derived from bovine sources and do not present any known risk of contamination with Bovine Spongiform Encephalopathy (BSE) or Transmissible Spongiform Encephalopathy (TSE).

A handwritten signature in blue ink, appearing to read "John A. Nagle II". The signature is fluid and cursive, with a prominent initial "J" and a long, sweeping underline.

John A. Nagle II
Quality Control Manager
